

## Know Maths one-to-one programme with Turn IT On

KnowMaths helps boost student performance with targeted one-to-one intervention.

We are working with Turn IT On to offer their primary schools a free trial of our intervention service, assessing the impact on 5 students over a 6 week period.

What are the benefits?

- **High Impact** - Performance data from schools has shown students improving by **2-3 sub-levels in one term**, in addition to positive anecdotal feedback from students and teachers in terms of confidence, engagement and learning resilience.
- **Supporting differentiation and targeting learning gaps** - Teachers can select the precise learning outcome for each student, reinforcing and accelerating their classroom instruction.
- **Student confidence** - immediate feedback and one-to-one interaction builds on classwork, whilst boosting confidence and engagement.
- **Quick and easy to use** - Teachers can book one-to-one sessions in less than a minute. Our tutors are available 5 days a week, from 8am to 5pm.
- **Great value** - Our mission is to make one-to-one affordable and accessible so every child can benefit, using technology we can do this for **only £13 per hour**.

**How does it work?** Students have a weekly one-to-one session. They talk to their tutor using a headset through our interactive on screen classrooms, whilst working through lesson plans which have been pre-selected by their teacher.

### About us and our tutors...

At KnowMaths, our ambition is to make regular one-to-one support affordable and accessible to schools, particularly where the academic and social need is greatest. And to do so in a manner that ensures all one-to-one is built around each teacher's classroom leadership.

To achieve this, we have taken a global approach to academic talent, employing mathematicians in India to play a support role to teachers and students in schools. The tutors are all maths graduates, who have been through our training scheme (developed with the IoE) and security processes, who work in-house from our academic centre. Our aim is to make one-to-one affordable and accessible enough so that all students can benefit, irrespective to background or location.
